

## Diamond Connection™ Solutions

Now, for fleets of  
all sizes, the power  
of Diamond  
Connection™  
Solutions can help  
solve numerous  
everyday inventory  
and shop  
management  
problems!

Put the *power, accuracy, and efficiency* of  
Diamond Connection™ Solutions to work for you  
with its easy-to-use parts inventory and work order  
features...now with more asked-for features  
including extensive networking capability.

---

### ***SIMPLY EASY-TO-USE***

Track all parts activity, manage the work order system, schedule PMs,  
and get valuable management reports using:

- Standard PC hardware
- Windows-based point and click operation
- Standard bar code scanning technology

### ***SIMPLY CONNECTED***

With the automated nightly data transfer, your International®  
Dealer will:

- Review your parts reorder requirements daily
- Deliver parts when they are needed
- Analyze your inventory data for potential additional cost savings
- Review past demand trends and anticipate future requirements

### ***SIMPLY INTERNATIONAL***

As your supplying *partner*, your International Dealer:

- Makes all arrangements to get you started
- Arranges for you to return all un-needed inventory
- Becomes your All-Makes parts source

## ***SIMPLY POWERFUL SOLUTIONS***

New and improved software *solutions* enables you to:

- Produce customized data queries for unique, specialized reports
- Value your inventory at average or actual cost
- Run the program on your existing Windows-based server
- Transfer inventory between networked locations
- Customize individual screens
- Record in-depth vehicle information with 10 user-defined fields
- Suspend PM scheduling for “out of service” vehicles...great for school bus fleets
- Manage full-feature work orders with multiple operations and technicians
- Respond in time to needed tasks via a powerful “reminders” feature
- Reopen and edit closed work orders
- Easily add outside repair detail to vehicle history
- Incur lower license fees for additional software users at a shop location
- Track and report fuel usage
- Track and report tire usage
- Import fuel purchase and mileage data from remote fueling systems
- Create and track purchases with a full-feature purchase order system
- Easily import “lists” such as part numbers, vehicles, employees, suppliers, etc.
- Track and report trip details, driver reports and state IFTA information
- Build a “parts list” for like-make and model trucks as parts are charged out
